in /jose-templador

Computer Science honors graduate (BS, CSUDH — May 2026) and full-stack software engineer with hands-on experience in C++, Python, JavaScript, and SQL/PostgreSQL. Built production-grade systems including a real-time C++ orbital simulation engine, machine learning prediction pipelines outperforming industry benchmarks, and a RESTful API backed by 279 unit tests using test-driven development. Strong foundation in data structures, algorithms, object-oriented programming, and agile development. U.S. citizen eligible for security clearance. Bilingual: English / Spanish.

PROJECTS

[OrbitWatch — Real-Time Satellite/Conjunction Tracker](#) | C++, Python, FastAPI, CesiumJS, NASA SPICE, pybind11, pytest

- Built a from-scratch C++ SGP4 propagation engine (pybind11) validated to under 1 meter, with a coarse/medium/fine screening cascade reporting miss distance, relative velocity, and RTN geometry.
- Validated detections against CelesTrak SOCRATES with epoch-matched Space-Track data, reproducing 100% of reference conjunctions (25/25, 40/40) to machine precision.
- Cut 16,000-satellite, 24-hour screen from ~25 GB to 5.4 GB and ~5 min via a fused C++ pipeline, a node-crossing time filter, and OpenMP.
- Deployed live on a Cesium.js globe with client-side propagation. Auto-refreshed 3x/day by GitHub Actions.

[NFL Player Performance Prediction System](#) | Python, CatBoost, XGBoost, LightGBM, Scikit-learn, Pandas, Streamlit

- Built a machine learning ensemble (CatBoost / XGBoost / LightGBM) achieving 4.26 MAE on player projections, outperforming industry DFS platforms (4.5 – 5.5 standard); trained on 109 weeks of historical data with 50 engineered features and rolling variance metrics.
- Iterated through 4 versions, applying cross-validation and hyperparameter tuning; CatBoost outperformed alternatives by 8–12%.
- Built an interactive Streamlit dashboard for analytics, enabling querying and model performance comparison across historical weeks.

[Portfolio Website + Live Star Viewer](#) | JavaScript (ES6), Canvas2D, Python, HTML/CSS

- Designed and deployed a personal portfolio site at josetemplador.com with a responsive design and modular front-end architecture.
- Created a Canvas2D rendering engine across 15 ES6 modules with drag/zoom controls, time manipulation, and constellation highlighting.
- Renders 15,598 real stars from the HYG v42 catalog (B-V color index mapping, distance brightness, and scintillation effects in real time).
- Computes planetary ephemeris at runtime using JPL Keplerian orbital elements.

[Crypto Market Trend Predictor](#) | Python, XGBoost, FinBERT, Kraken/Reddit/X APIs

- Designed a classification machine learning pipeline combining price data with social media sentiment from Reddit and X (Twitter) APIs.
- Applied FinBERT transformer model for financial sentiment scoring; integrated Kraken REST API for real-time price data and technical indicators (MACD, RSI, Bollinger Bands).

SKILLS

Languages: Python, C++, Java, JavaScript, SQL, HTML/CSS

ML/Data: CatBoost, XGBoost, LightGBM, Scikit-learn, Pandas, NumPy, FinBERT, Parquet, Predictive Modeling, Feature Engineering, Ensemble Methods, Cross-Validation

Databases: PostgreSQL, SQL

Frameworks: FastAPI, Node.js, Streamlit, CesiumJS, pybind11, OpenMP, pytest

Tools: Git, GitHub, Github Actions (CI/CL), Linux, Docker, CMake, Make, REST APIs, Jupyter, JIRA, NASA SPICE, Canvas2D

EDUCATION

Bachelor of Science with Honors in Computer Science

California State University Dominguez Hills, Carson, CA | May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Machine Learning, Object-Oriented Programming, Computer Architecture

Associate of Science — Mathematics (and 5 additional associate degrees across STEM, arts, and humanities)

Riverside City College, Riverside, CA | Graduated May 2022

PROFESSIONAL EXPERIENCE

Worship Band Leader / Music Director | House of the Lord | Ontario, CA

July 2018 – Present

- Leading a team of 8+ musicians across weekly rehearsals and live performances, managing scheduling, set lists, and real-time stage coordination. Collaborate with A/V volunteers on live sound production.

Full-time Undergraduate Study & Project Development | CSU Dominguez Hills | Carson, CA

April 2024 – Present

Civil Analyst | Hampton Tedder Electric | Montclair, CA

October 2023 – April 2024

- Owned project closure workflows, reducing documentation backlog and ensuring on-time billing submissions.
- Monitored and reconciled project expenses, maintaining cost reporting accuracy under tight deadlines.
- Flagged resource conflicts in daily standups with PMs, contributing to on-time delivery across active projects.

Caregiver | Right at Home | Ontario, CA

July 2018 – March 2023
