Computer Science honors graduate (BS, CSUDH — May 2026) and full-stack software engineer with hands-on experience in C++, Python, JavaScript, and SQL/PostgreSQL. Built production-grade systems including a real-time C++ orbital simulation engine, machine learning prediction pipelines outperforming industry benchmarks, and ETL pipelines loading 10M+ California property records into production. Strong foundation in data structures, algorithms, object-oriented programming, and agile development. U.S. citizen eligible for security clearance. Bilingual: Eng./Spa.

PROFESSIONAL EXPERIENCE

Data Engineer | Assessify | Remote *Aug 2026 – Present*

- Built, collected, cleaned, validated, and delivered 10M+ California property records and 9.9M parcel shapes from dozens of public county sources into the production database behind Assessify's client case scores, backed by 222 automated tests and per-load verification.
- Analyzed 10M+ property records and computed county- and ZIP-level geographic and market statistics (median assessed value, value per sq ft, value ranges, homeowner share), published on an interactive California property tax map for Assessify's public data page.
- Collaborated on an interactive statewide parcel map and shipped a live comparable-sales viewer in the user dashboard.

PROJECTS

OrbitWatch — Real-Time Satellite/Conjunction Tracker | *C++, Python, FastAPI, CesiumJS, NASA SPICE, pybind11, pytest*

- Built a C++ SGP4 propagation engine (pybind11) validated to under 1 meter, with a coarse/medium/fine screening cascade reporting miss distance, relative velocity, and RTN geometry.
- Validated detections against CelesTrak SOCRATES with epoch-matched Space-Track data, reproducing 100% of reference conjunctions.
- Cut 16,000-satellite, 24-hour screen from ~25 GB to 5.4 GB and ~5 min via a fused C++ pipeline, a node-crossing time filter, and OpenMP.
- Deployed live on a Cesium.js globe with client-side propagation. Auto-refreshed 3x/day by GitHub Actions.

NFL Player Performance Prediction System | *Python, CatBoost, XGBoost, LightGBM, Scikit-learn, Pandas, Streamlit*

- Built a machine learning ensemble (CatBoost / XGBoost / LightGBM) achieving 4.26 MAE on player projections, outperforming industry DFS platforms (4.5 – 5.5 standard); trained on 109 weeks of historical data with 50 engineered features and rolling variance metrics.
- Built an interactive Streamlit dashboard for analytics, enabling querying and model performance comparison across historical weeks.

Portfolio Website + Live Star Viewer | *JavaScript (ES6), Canvas2D, Python, HTML/CSS*

- Created a Canvas2D rendering engine across 15 ES6 modules with drag/zoom controls, time manipulation, and constellation highlighting.
- Renders 15k+ real stars from the HYG v42 catalog (B-V color index mapping, distance brightness, and scintillation effects in real time).
- Computes planetary ephemeris at runtime using JPL Keplerian orbital elements.

SKILLS

Languages: Python, C++, Java, JavaScript, SQL, PHP, HTML/CSS
ML/Data: CatBoost, XGBoost, LightGBM, Scikit-learn, Pandas, NumPy, FinBERT, Parquet, Predictive Modeling, Feature Engineering, Ensemble Methods, Cross-Validation, ETL Pipelines
Databases: PostgreSQL, MariaDB/MySQL, DuckDB, SQL

Frameworks: FastAPI, Laravel, Node.js, Streamlit, CesiumJS, deck.gl, pybind11, OpenMP, pytest
Tools: Git, GitHub, GitHub Actions (CI/CD), Linux, Docker, CMake, Make, REST APIs, ArcGIS, Jupyter, JIRA, NASA SPICE, Canvas2D

EDUCATION

Bachelor of Science with Honors in Computer Science
California State University Dominguez Hills, Carson, CA | May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Machine Learning, Object-Oriented Programming

Associate of Science — Mathematics (and 5 additional associate degrees across STEM, arts, and humanities)
Riverside City College, Riverside, CA | Graduated May 2022

OTHER EXPERIENCE

Worship Band Leader / Music Director | House of the Lord | Ontario, CA *July 2018 – Present*

- Lead a team of 8+ musicians across weekly rehearsals and live performances, managing scheduling, set lists, and real-time stage coordination. Collaborate with A/V volunteers on live sound production.

Full-time Undergraduate Study & Project Development | CSU Dominguez Hills | Carson, CA *April 2024 – May 2026*

Civil Analyst | Hampton Tedder Electric | Montclair, CA *October 2023 – April 2024*

- Owned project closure workflows, reducing documentation backlog and ensuring on-time billing submissions.
- Monitored and reconciled project expenses, maintaining cost reporting accuracy under tight deadlines.

Caregiver | Right at Home | Ontario, CA *July 2018 – March 2023*
